Road Tech

Rocker Shape

Our rocker shape is designed to give the feeling of being propelled forward with each step and provides an efficient toe-off without taking away from your natural stride.

Zero to Low Drop

Altra shoes are built to place your foot in a natural position. With zero to low drop, you start with a stable and confident foundation to run on. Why would you run in heels?

Stack Heights

As the stack height varies, so does the response. Road, trail, technical terrain, and more can all have an effect on response levels. Here's how it works:

Less Foam

(lower stack height)

- Closer to the ground
- Slightly more responsive
- More intimate interaction with the ground

More Foam

(higher stack height)

- More foam between your foot and the ground
- Traditionally less responsive (we make it a point to maintain responsiveness even with higher stack heights)
- Foot interacts more with the foam while the foam interacts with the ground

FWD VIA

Altra's Original FootShape Fit with room for your toes and space in the midfoot for a familiar Altra feel

Engineered spacer mesh upper for style and breathability

All-new Altra EGO™ FLO supercritical midsole foam for a soft and max-cushioned ride

Low drop with retuned rocker shape geometry for a smooth transition and efficient toe-off

Altra EGO™ PRO

It's called "PRO" for a reason. You no longer have to choose between cushion and response – this lightweight foam gives you both.

Full-Length Carbon Fiber Plate

We partnered with carbon fiber expert Carbitex™ to design a full-length carbon fiber plate that naturally flexes with your foot, providing added boost and propulsion.

Rocker. On.

Our rocker shape is designed to give the feeling of being propelled forward with each step and provides an efficient toe-off without taking away from your natural stride.

Trail Tech

GORE-TEX™ TECHNOLOGY

According to GORE-TEX™, tested and proven for durably waterproof, windproof, & breathable performance, backed by the GORE-TEX GUARANTEEED TO KEEP YOU DRY™ promise.

VIBRAM® LITEBASE

Vibram® Litebase midsole reduces 30% of the overall sole weight through a reduction of the sole thickness by 50%, while maintaining Vibram quality in grip, traction, and durability.

VIBRAM® MEGAGRIP

This high-performance sticky rubber offers grip on both wet and dry surfaces, rugged longevity, and optimal ground adaptability.

TRAILCLAW™

These canted lugs on the outsole are strategically placed beneath the metatarsals to provide added traction underfoot.

MAXTRAC™

Our grippy MaxTrac™ outsole provides what we believe to be the perfect combination of grip, traction, and durability on all types of terrain.

GAITERTRAP™

This hook-and-loop tab allows our strapless gaiter to easily attach to the shoe.

STONEGUARD™

Inspired by the human feet to provide lightweight rock protection.

Lone Peak 9+

Durable no-sew overlays and ripstop mesh upper for high mileage durability

Altra's Original FootShape Fit with room for your toes and space through the midfoot so you can move naturally

Vibram® Megagrip outsole for unparalleled grip on both wet and dry surfaces

A Range of FootShape Fits For a Range of Feet

TYPICAL SHOE SHAPE

Not shaped
like a foot.

ORIGINAL FOOTSHAPE FIT

The FootShape Fit that started
it all, Original is the roomiest
of our three options.

Find it in:

FWD Via
Escalante Family
Lone Peak Family
Olympus Family

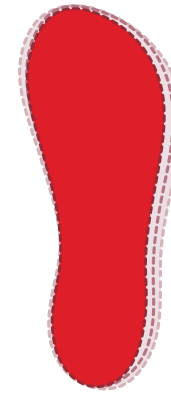

STANDARD FOOTSHAPE FIT

Our most common
Footshape Fit, right in the
middle of Original and Slim.

Find it in:

Experience Family
Torin 8
Paradigm 7
Provision 8
Superior 7
Timp Family
Mont Blanc Family

SLIM FOOTSHAPE FIT

Our slimmest-fitting option still
allows room for your toes to
spread out naturally.

Find it in:

Vanish Carbon 2
