

CANADA

SNOW

WE KNOW COLD WEATHER

OUR STORY

MADE FOR VARIOUS CLIMATES

Canada Snow knows cold weather and tough winds. It's a big part of our everyday life, and has been since 2004 when the brand was founded. Based on experiencing and studying the varied, Nordic climate, we have developed our product line. With top quality products designed with great accuracy and skill, our shoes and accessories aim to provide you with the quality, functionality, comfort and durability that work in both a colder and milder climate.

PRODUCTS FOR DIFFERENT CONDITIONS

At Canada Snow, you'll find warm boots that are wind-and water repellent. They will keep you warm and stylish during the colder season's crispy days. Natural materials like sheepskin, lamb wool, genuine leather and other warming, durable, natural raw materials offer high resistance, comfort and durability in the collections. A large part of our product development is still about studying nature and how we best manage it.

PREMIUM COLLECTION

TORONTO PREMIUM

The iconic Toronto Premium Curling Boot from Canada Snow were originally made in 2010 to give life to the ultimate curling boot. With that said, this curling boot is premium in the sense that all materials should be the absolute best one can get. This shoe is 100% handmade with greatest craftsmanship.

1. OUTSIDE

The upper outside is made of premium suede with 4 hours water repellent treatment. This makes the shoe water- and dirt-repellant.

2. LINING

The inner lining of organic merino wool insulated well and will keep you comfortable in all different climates and temperatures.

3. INSOLE

The removable insole is made of 4 different insulating materials. Sheepskin, aluminium, cork and Thinsulate.

4. MIDSOLE

The midsole is made of organic cork from European cork trees, which gives an excellent thermal insulation combined with great comfortability. The sides of the midsole is sealed by natural rubber.

5. VIBRAM OUTSOLE

The outsole is made of premium rubber with arctic grip inserts to avoid slipping.

6. RUBBER MOLD

The outer sole is molded by hand to fit the shoe perfectly.

7. ZIPPER

High quality Zip from YKK.

LADIE'S SHOES

Toronto Premium is characterized by an elegant and excellent design, all within the limits of organic thinking and standard. Stylish, functional and eye-catching.

VIBRAM SOLE

Vibram is an Italian sole manufacturer that specialises in producing high-tech rubber soles. They are designed with a unique pattern that provides excellent traction on various surfaces, including wet and slippery surfaces.

QUEBEC

Keep both you and the style secured during the winter season with Canada's popular curling boots and boots for ladies. With a top in water- and dirt-repellent suede, sheepskin lining for good thermal insulation and comfort, as well as outer sole with anti-slip properties and optimum grip ability, the curling boots are equally ideal during damp days as when the cold and the ice hit.

FLUORINE-FREE WATER REPELLENT TREATMENT

The life of our suede materials is prolonged by our Fluorine-free water repellent treatment. It gives a long-lasting ultimate and protective performance.

Water-repellent polymers form a protective structure on the surface of the material, where the water molecule cannot penetrate, because the size of the water molecule are larger than that of the polymers. The polymers have the appearance of a branched structure, like the branches of a treetop.

FIBERGLASS SOLE

A flexible variant of anti-slip protection that increases the grip properties. The sole has elements of rubber and fiberglass field which thus increases grip in winter time.

MOUNT BAKER

One of our pure classics. Treated suede uppers that are water repellent. Functional, high-quality YKK zip on the inside and strong outer sole in a rubber blend for good comfort. The boot has a small built-in wedge about 5 mm thick, as well as a lining and removable insole in genuine sheepskin.

MOUNT BAKER black

GET A GRIP

Freedom of movement with ALPI OCsystem®

Quality and function are the fundamental components of our brand. Therefore they form the basis of our Get a Grip Collection, a product range designed to provide a better grip on slippery surfaces such as ice and snow.

Due to the winter's challenging weather and the quick changing temperatures we have found the perfect solution in the Italian ALPI OCsystem®. Here you can easily fold-out or fold-in the spikes depending on the conditions you are active in. This offer you to always have the ultimate grip, no matter if you are outside in the street or for example indoor in a shopping center.

ALPI OCsystem®

An Italian made modular anti-slip solution that allows you to angle out the spikes when the ground gets slippery and extra grip is needed. Every pair with ALPI OCsystem® comes with a key tool to access the modules.

MOUNT FIONA

A modern and warm winter group lined with genuine sheepskin and an insole with several heat-insulating layers. The boots close with YKK zippers on the inside of the shafts. Outsoles with practical fold-out spikes from Italian ALPI OCsystem®.

THE FOUR INSULATING LAYERS

The majority of the shoes in Canada Snow's collection are made with the four insulating layers; wool, aluminum, cork and Thinsulate. It provides excellent protection against cold. Wool offers natural warmth and breathability, while aluminum reflects heat back towards the foot, improving thermal retention. Cork serves as a lightweight, moisture-absorbing barrier that further insulates, and Thinsulate provides superior, lightweight insulation that traps heat without adding bulk. Together, these layers work synergistically to keep feet warm, dry, and comfortable in cold conditions.

MEN'S SHOES

TORONTO PREMIUM

The iconic Toronto Premium Curling Boot from Canada Snow were originally made in 2010 to give life to the ultimate curling boot. With that said, this curling boot is premium in the sense that all materials should be the absolute best one can get. This shoe is 100% handmade with greatest craftsmanship. For detailed info, please see page 5.

The design of these boots is elegant and excellent all within the limits of organic thinking and standard. Stylish, functional and eye-catching. The combination of heat and a light weight feel make it possible for the versatility. These curling boots work equally well during a sunny day in the mountains, as for walk during a cold fall evening.

TORONTO PREMIUM black
2125469

PREMIUM MATERIALS

The boot has a merino leather lining and an insole in sheepskin. It's equipped with a functional, high-quality YKK zip. The tread is a genuine premium rubber sole, and the outsole is a solid craftsmanship made by hand. The sole contains genuine cork for superior insulation.

MOUNT VERM SYMPATEX

A classic, sporty boot with a strong 3 mm built in wedge for optimum comfort and a comfort insole with several insulating layers. Wool lining of different thicknesses for good insulation.

WATERPROOF

Canada Snow boots with sympatex are 100% waterproof.

BREATHABILITY

These shoes are not only waterproof but also "breathing". In a pair of waterproof shoes, breathability is actually the most important feature when it comes to keeping your feet dry.. The sympatex membrane allows the water vapor from inside the shoe to be transported away from the foot, "breathe", and discharge it to the outside.

TAPED SEAMS

The most exposed parts of a pair of waterproof shoes are the seams. This is because of the small holes the sewing needle creates when the seams are sewn. By taping the seams, these holes are sealed and water cannot penetrate.

MIDSOLES – warmlined and heat insulating

The midsoles of the boots has a special 4-layer insole. It is made of natural cork, aluminium, Thinsulate™ and real sheepskin leather, to give you the best possible comfort.

sympatex™

LADIE'S JACKETS

SHEILA

Sheila is a lightweight down jacket from Canada Snow. Made of polyester that has a water-repellent effect. The jacket is lined with 80% down and 20% feather that will keep you warm during autumn & winter. The jacket has luxurious gold-colored details, a removable hood, hidden cuffs and zippers on the sides for the best fit.

BIONIC FINISH® ECO

This is a Fluorine-free water repellent finish for premium outer materials used to prolong the life of the material and to offer a long-lasting ultimate performance.

With BIONIC Finish Eco, you have a variety of branched, water-repellent polymers to imitate the appearance of a branched structure, like the branches of a treetop. These polymers then form a protective structure on the surface of the material, where the water molecule cannot penetrate, because the size of the water molecule is larger than that of the polymers.
