READY WHEN YOU ARE

You don't wait for perfect conditions.
You go when the moment feels right.
The weather changes.
Plans change.
Still, you go.
The day doesn't turn out as expected.

We make sure your gear performs —
even when you can't plan for everything.

/ EST. 1976

Halti is ready, when you are.

ALWAYS GOOD WEATHER

You don't wait for better conditions.
You go when it works for you.

The weather doesn't always change much. Until it does. A clear day can turn into rain, and wind can rise along the way.

That's why protection needs to be simple, lightweight and easy to carry.

Halti Valkama DrymaxX® 2.5-layer shell is designed for reliable waterproof protection, breathability and packability, without unnecessary extras.

Ready when you need it. Out of the way when you don't. So you can focus on moving forward.

Valkama 2.5L DX Jacket

OUTDOOR STARTS AT THE FRONT DOOR

You step outside — and it begins.

It starts from where you are and continues from there.

A familiar route can turn into something more. Conditions change. The terrain shifts.

That's why your gear needs to work beyond the first step — across everything the day brings.

Pallas Next products are designed for that continuity and tested in changing Nordic conditions.

Because outdoor isn't a separate moment. It's something you step into. And keep moving in.

SUN PROTECTION UPF 90+

The sun doesn't just feel
strong — it is.

Exposure builds while you move
outdoors.

That's why protection needs to be built
into what you wear, without adding
weight or limiting movement.

Halti UPF 90+ fabrics block up to 98.8%
of UV radiation and are designed for long
days outdoors.

Lightweight, breathable materials feel
cool on the skin and keep you comfort-
able in warm conditions.

Samoy LS Shirt

TRAIN OUTDOORS, YOUR OWN WAY

You don't always plan to train
— but you move anyway.

Not every session starts with a goal.

Sometimes it's a run, sometimes a walk — sometimes just a moment to get outside.

Movement happens in different ways, in different places.

That's why your gear needs to adapt to how you move.

Halti Active Sport is designed for real movement. Built to perform across changing intensity and pace.

Because training outdoors doesn't follow one pattern. It follows your pace.

THIS IS HALTI

Since 1976, Halti has been designing outdoor gear in the unpredictable Finnish climate.

Our products are made for those who hike, train and ski — and for anyone who chooses to head outdoors, whatever the conditions. For people with the drive — the *sisu** — to keep going when the weather changes.

Tested year after year in northern conditions, Halti gear is built for reliability, durability and real use.

* A Finnish expression for determination, guts, resilience and perseverance combined.
