
LaMunt
FALL / WINTER 2027

BALANCE: A NEW CHAPTER FOR LAMUNT

LaMunt was born from a new female perspective of the mountain, created by women, for women. Today, this perspective continues to evolve, shaped by the women who are part of our journey.
And now, this journey naturally opens to a **new chapter.** As I step into my new role as President of the Oberalp Group, LaMunt continues to evolve with **Elena Colombo** stepping in to guide the brand forward. Elena has been part of LaMunt since the very beginning, helping to shape its commercial direction and sharing the **values and vision** that have guided us since our first steps. For me, this is not about stepping away, but about allowing something we created with passion to **continue growing.**
As Founder, I will remain closely connected to LaMunt, while Elena brings her own **perspective, energy and deep connection to the mountains** into this new chapter.

Ruth Oberrauch
Founder, LaMunt

And perhaps there could be no better moment to speak about **balance.**
Balance is the guiding idea behind our **Fall/Winter 2027/28 collection.** The balance we seek in our lives and in the mountains: between being active and simply enjoying being there, between movement and stillness, between **time together and time for ourselves.** The balance between **autumn** and **winter,** as the mountains slowly change their rhythm. And the balance within our products, where **recycled materials** meet **natural fibers** and technical functionality meets **feminine finesse.**
This season, balance comes to life through **versatility.** Pieces move naturally between **activity and enjoyment, the mountains and everyday life,** while **neutral and more expressive colours** create new possibilities to combine and layer. Autumn becomes a **season to embrace,** with protection when you need it and **soft, natural materials** bringing warmth and cosiness.
Because balance does not mean standing still. It means finding your **own rhythm – in the mountains and in everyday life.**

Elena Colombo
Brand Manager, LaMunt

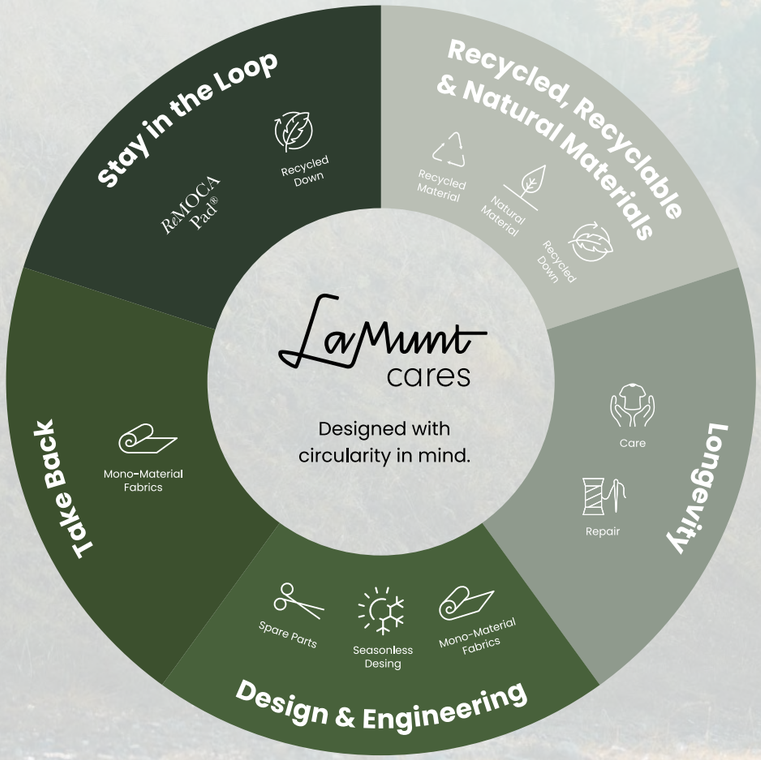

LAMUNT – THE COMMUNITY BRAND FOR SELF-CONFIDENT WOMEN IN MOUNTAIN SPORTS.

It comes from a love of the mountains and the belief that outdoor apparel can be more than just functional. **Our designs combine technical, high-performance materials** built for the challenges of the mountains, with feminine finesse, offering comfort, protection, and style, whether on multi-day mountain and ski tours, spontaneous hikes, adventures, or quiet moments enjoyed with a view of the peaks. The name LaMunt comes from Ladin, an ancient Rhaeto-Romance language spoken in the Dolomites, and means "mountain" - but in Ladin, **"the mountain" is feminine.** It combines the soft, feminine article "La" with the strong power of "Munt." This contrast represents our brand: self-determined, yet sensitive and detail oriented.
Our mission is to give relevance to the female perspective on the mountains. This includes the idea of **Mountain Me-Time:** moments that belong entirely to you: conscious, self-determined, and individual. Whether alone or in company, we aim to inspire women to experience the mountains in their own way, free from performance pressure, filled with a spirit of discovery, and with joy in shared experiences.
LaMunt is **community**. It blossoms from the exchange between women united by one passion: their love for the mountains. From this dialogue, new ideas, shared experiences, and inspiration for our collections grow. A key pillar of this is the **LaMunt Crew,** a group of women who test our products, give feedback, and bring in new perspectives. But our community goes far beyond that: every woman who embraces her **Mountain Me-Time,** and enjoys sharing it with others, is part of it. This is how Mountain Me-Time becomes Mountain Us-Time and thus, part of LaMunt. Under the guiding principle of LaMunt Cares, we aim to make choices that support responsible practices across the value chain. We rely on recycled materials and fabrics derived from renawable raw materials, promote safe working conditions and high labour standards and develop our products according to the principle of **"Design with Circularity in Mind"** - creating long-lasting companions.

LaMunt cares

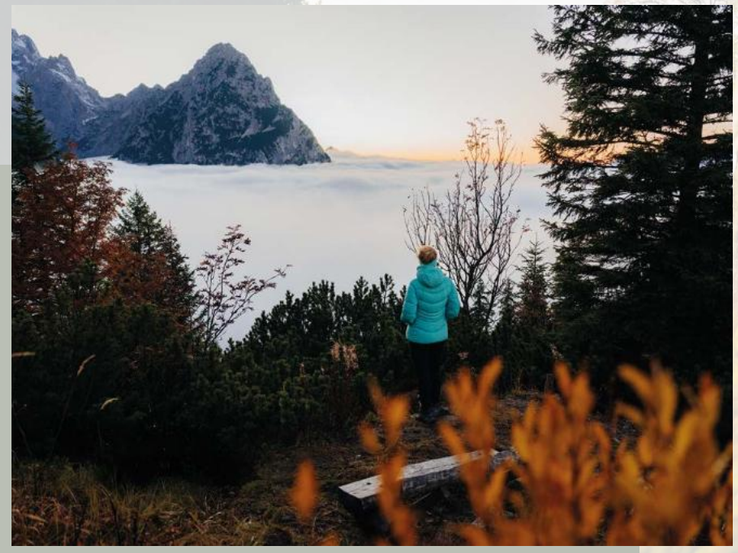

LaMunt Cares has been part of our DNA since day one. It's a holistic approach that is reflected in every product development. For us, "LaMunt Cares" doesn't mean achieving a fixed goal, but rather embarking on a continuous journey of improvement - step by step towards **circularity**, or in other words, the **circular economy.**

Our principle, **"Designed with Circularity in Mind"**, begins with the meticulous selection of materials. We rely on an increasing variety of recycled fabrics and materials sourced from renewable raw materials such as wool, cashmere, man- made cellulosic fibres, such as Tencel®. Technologies like **ReMOCA®**, our in-house insulation made from production scraps of ski touring skins, and **ReDown®**, a lightweight and warm filling made from recycled down, allow us to use existing materials and production scraps to create new products.

Wherever possible, we develop products using **Mono-Material fabrics** to facilitate recycling at the end of the product lifecycle, when dedicated infrastructures are in place. To extend this lifecycle, we offer an in-house **Care & Repair service**, have developed a **LaMunt Repair Kit,** and provide guidance on the proper care of our products. The reason for our journey towards circularity is not only to avoid waste but also our focus **on reducing greenhouse gas emissions.**
Through Life Cycle Assesments (LCA), we analyze the environmental impact of our products and incorporate the results into product development allowing us to target the areas where improvements can be most effective.

We promote safe working conditions and high labour standards. As a member of the multi-stakeholder initiative **Fair Wear Foundation,** dedicated to improving working conditions in the textile sector, our commitment and actions are evaluated each year through the Brand Performance Check. We maintain an internal **Chemical & Environmental Management** system aligned with our Chemical Policy and Environmental Policy, and we deliberately build long-term partnerships that form the foundation of continuous improvement across social and environmental standards.

OUR DESIGN PRINCIPLES

LaMunt was developed based on 4 design principles that express at its best the brand and product soul: Ali shape, Smart Fit Solution, Versatility and Magic Moment. Every product we make is built upon these principles and is realised in different shades of the sesonal colours.

Colours are paired by nuance and not by contrast in order to create different outfit and looks, from an easy and plane one to a strong and more colorful one. Colours are messages, and the message we want to give is: Be serene, enjoy your Mountain Me-Time.

ALI SHAPE

Our Ali shape design concept, which translated from Italian means 'wings' and expresses the lightness and curves we follow in this collection. We were inspired by nature; it is about ventilated areas and curves in our design that are gentle to the feminine body and protect the areas of the female body where needed most.

SMART FIT SOLUTION

A uniquely from LaMunt developed concept of solutions which let the individual users personalize the fit of a product to their individual body shape. Smart Fit Solutions also allow you to adjust the length of a sleeve, to adapt the shape of a jacket or the size of a pant.

VERSATILITY

The principle of versatility means for LaMunt that our designs include elements that can be moved, taken off, repurposed, recombined and changed. A product can be turned around to be worn in two different color styles and for many different occasions.

MAGIC MOMENT

Magic moments are little details that you discover after a while, small surprises that give a special twist to the experience with the product. Like an illustration inside your jacket, a secret pocket, a special pattern or an inspirational quote that makes you smile.

LaMunt CREW

From day one, we chose to start from this concept, creating a group of 24 women from Italy, Germany, Austria, and Switzerland. They are our closest circle: **the LaMunt Crew.** A group of diverse women with unique stories and backgrounds: entrepreneurs, teachers, designers, ski instructors, and many others, united by a shared passion for the mountains.

Together with them, our collections take shape, because they are born from **real, lived experiences.** Once a year, we gather in the mountains: we share time, sport, and ideas. Between one activity and the other, we work together to improve, listen to one another, and bring our vision to life.

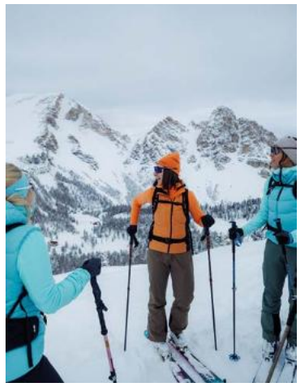

LaMunt Crew

BY WOMEN FOR WOMEN

THE COMMUNITY BRAND FOR SELF-CONFIDENT WOMEN IN MOUNTAIN SPORTS

THE STATE OF SHARING OR HAVING CERTAIN COMMON TRAITS AND INTERESTS.

LaMunt started partnering with **female outside communities** other groups that share our approach to the mountains. It was a natural journey: when you share the same values, collaboration can only blossom.
Today, these connections stretch across Italy, Switzerland, Germany, and Austria. Our **five communities** mean much more to us than just a project: they are **relationships**, shared **experiences**, and new ways of **experiencing the mountains.**

Together, we are helping to promote a growing female perspective of the outdoors, built on authenticity, openness, and sharing.

DONNE di MONTAGNA

CHIXXS ON BOARD

SPRTNG WMN sportingWOMEN

THE female explorer be your wildself

ladiestour.bayern

Supporting these communities for us is a journey of growth. Every collaboration is an exchange of experiences, of visions, of different ways of experiencing the mountains. And it is precisely by looking beyond borders that we have come to realize something profound in different places, with different languages, and in different contexts, the same desire is emerging. **More and more women are choosing to experience the mountains together.** Not to prove anything, but to feel free, supported, and part of something bigger.

This pattern, which repeats itself across different countries, confirms that this is not just a trend, but a **real change.** A new way of being in the mountains: more mindful, more inclusive, more authentic. For us it is a privilege to walk alongside these communities, support them, and grow together.

Because it's from these **connections** that lasting change is born:
a new female perspective on the mountains, built together, step by step.

SUSTAINABILITY CRITERIA EXPLANATION

Social – Audited Factory

Our products are made in factories that have signed our Responsible Business Conduct and Code of Conduct. All our partners are subject to our internal human rights due diligence processes, which enables us to identify, prevent, mitigate, and address risks and negative impacts that may occur along the supply chain. In countries where the risks for workers are higher, we carry out audits with expert third-party organisations and agree on improvement plans where it is needed. LaMunt is a member of Fair Wear Foundation, a multi-stakeholder initiative that specialises in the improvement of working conditions in the textile industry. Products marked with “x” are sewn in a factory located in lower-risk countries or monitored through audits and corrective measure plans. In this overview, you can find the country where each product is made. We can also provide further details on the factory upon request.

Environmental – HIGG FEM

We utilize the Higg Index to monitor the environmental performance of the production facilities within the Facility Environmental module (FEM). Factories assessed using the Higg FEM within the last two years are marked with “x”.

Chemical Standard Tested

LaMunt products are covered by the Oberalp Chemical Policy, the document that drives internal process to control the presence and use of chemical substances in our products and production processes. In the Policy you can find the Restricted Substances List (RSL), containing all chemicals that are excluded from or limited in all our products. Our suppliers must commit to fulfilling our Chemical Policy and our Responsible Business Conduct, and most of the fabrics and trims we use are certified to external standards (for example, bluesign®). To ensure that our materials comply with our standards, we carry out testing with third-party laboratories.

bluesign©

LaMunt products are covered by the Oberalp Chemical Policy, and our suppliers commit to producing our materials in compliance with our Restricted Substances List (RSL). To further ensure compliance with our chemical standards, we carry out extensive testing with third-party laboratories, and most of the fabrics we use are certified by external standards. Styles marked “x” under this criterium feature main fabrics, linings, or fillings that are bluepass certified , meeting the bluesing Criteria.

Water Repellency Treatment

From the beginning, LaMunt has made the deliberate choice of avoiding per- and polyfluorinated substances (PFAS) in our water-repellent finishes. This decision is fully aligned with current and upcoming regulatory restrictions and with internationally recognised chemical management standards.

This commitment applies to all products in our range that are treated with a water-repellent finish and is supported by supplier declarations as well as testing conducted by independent laboratories. PFAS-free finishes may lose performance faster with use and washing. That’s why regular care and reproofing are important — to maintain water repellency and keep your garment performing longer. Styles marked with “x” are treated to be water-repellent.

Recycled Materials

We use recycled materials to reduce the need for virgin resources and help divert waste. LaMunt products marked with “x” contain 50% or more recycled content in the main fabric, lining, or filling. ReDown feathers are recovered from post-consumer goods, extending the usable lifespan and reducing demand for virgin down. This process also cuts down on waste that might otherwise go to landfills.

Natural and Renewable Raw Materials

Natural raw materials are derived from naturally occurring sources. Renewable raw materials originate from resources that can regenerate frequently within a set period of time, reducing dependence on finite fossil-based resources. LaMunt products marked with “x” are made with 50% or more of natural and renewable raw materials on the main fabric, lining, or filling. We use cashmere to fill our warmer jackets, a blend of Merino Wool and Tencel® for t-shirts, socks, and next-to-skin inserts, a cotton-modal jersey for t-shirts, a blend of modal and cashmere for our seamless styles and socks, and a double-face technical mix of wool and recycled polyester for our thermals.

Mono-Material

All fabrics used in this garment are made of high-quality mono-material fibres, a design approach intended to support easier recycling at the end of the product’s life. When this product can no longer be used or repaired, please remove the zips and trims to help in facilitating the recycling process.

Mulesing Free

LaMunt applies a due diligence process to ensure that the wool used does not originate from farms that practice mulesing. The documentation required varies according to the level of risk associated with the country of origin. In addition, part of the wool sourced comes from farms certified under the Responsible Wool Standard (RWS).

No components of animal origin

LaMunt products marked with “x” are 100% animal component free.

LEGEND

Smart Fit Solution
A uniquely developed concept by LaMunt for personalizing the fit of a product to the individual body shape.

Versatile
The product includes elements that can be moved, taken off, repurposed, recombined or changed.

Breathable
Made of breathable fabric that permits air and moisture to pass through it. It allows and guarantees transpiration.

Windproof
The product fabric doesn't let the wind through and keeps warm by retaining the insulating air trapped by inner layers of clothes.

Waterproof
Special waterproof fabric and fully taped seams make it suitable for heavy rain to keep you dry.

Water Repellent
The product is resistant but not impervious to penetration by water and keeps dry for a relatively short time when walking in the rain.

Anti Odor
Helps prevent odors and provides a long-lasting dry feeling

Light
The light weight of the products fabric makes it ideal for your performance.

Stretchable
Elastic, technical material that can stretch provides maximum freedom of movement.

Packable
Due to its lightweight material, the product can be folded into a practical pocket provided with each garment.

Warm
The product material keeps warm and protects from colder days.

Recycled Down
The product is filled with recycled down.

Cashmere
This product is made from premium cashmere fibres and natural plant based fibres.

Natural Material
The product is made of ethically sourced wool.

Recycled Material
Made of recycled polyester yarn in order to respect nature and keep the environmental impact as low as possible.

Complete Your Look
Exclusive LaMunt accessories to add a unique touch.

Reversible
The product is wearable from both sides depending on mood and activity.

Performance
This material supports your activeness in the mountains and provides protection.

Comfortable
Made for providing you a soft and pleasant feeling directly on skin.

Mono-Material Fabrics
The mono-material fabrics of this product make recycling easier.

New Color

HOW TO MEASURE

Chest
Measure horizontally under the armpits and over the widest part of the chest.

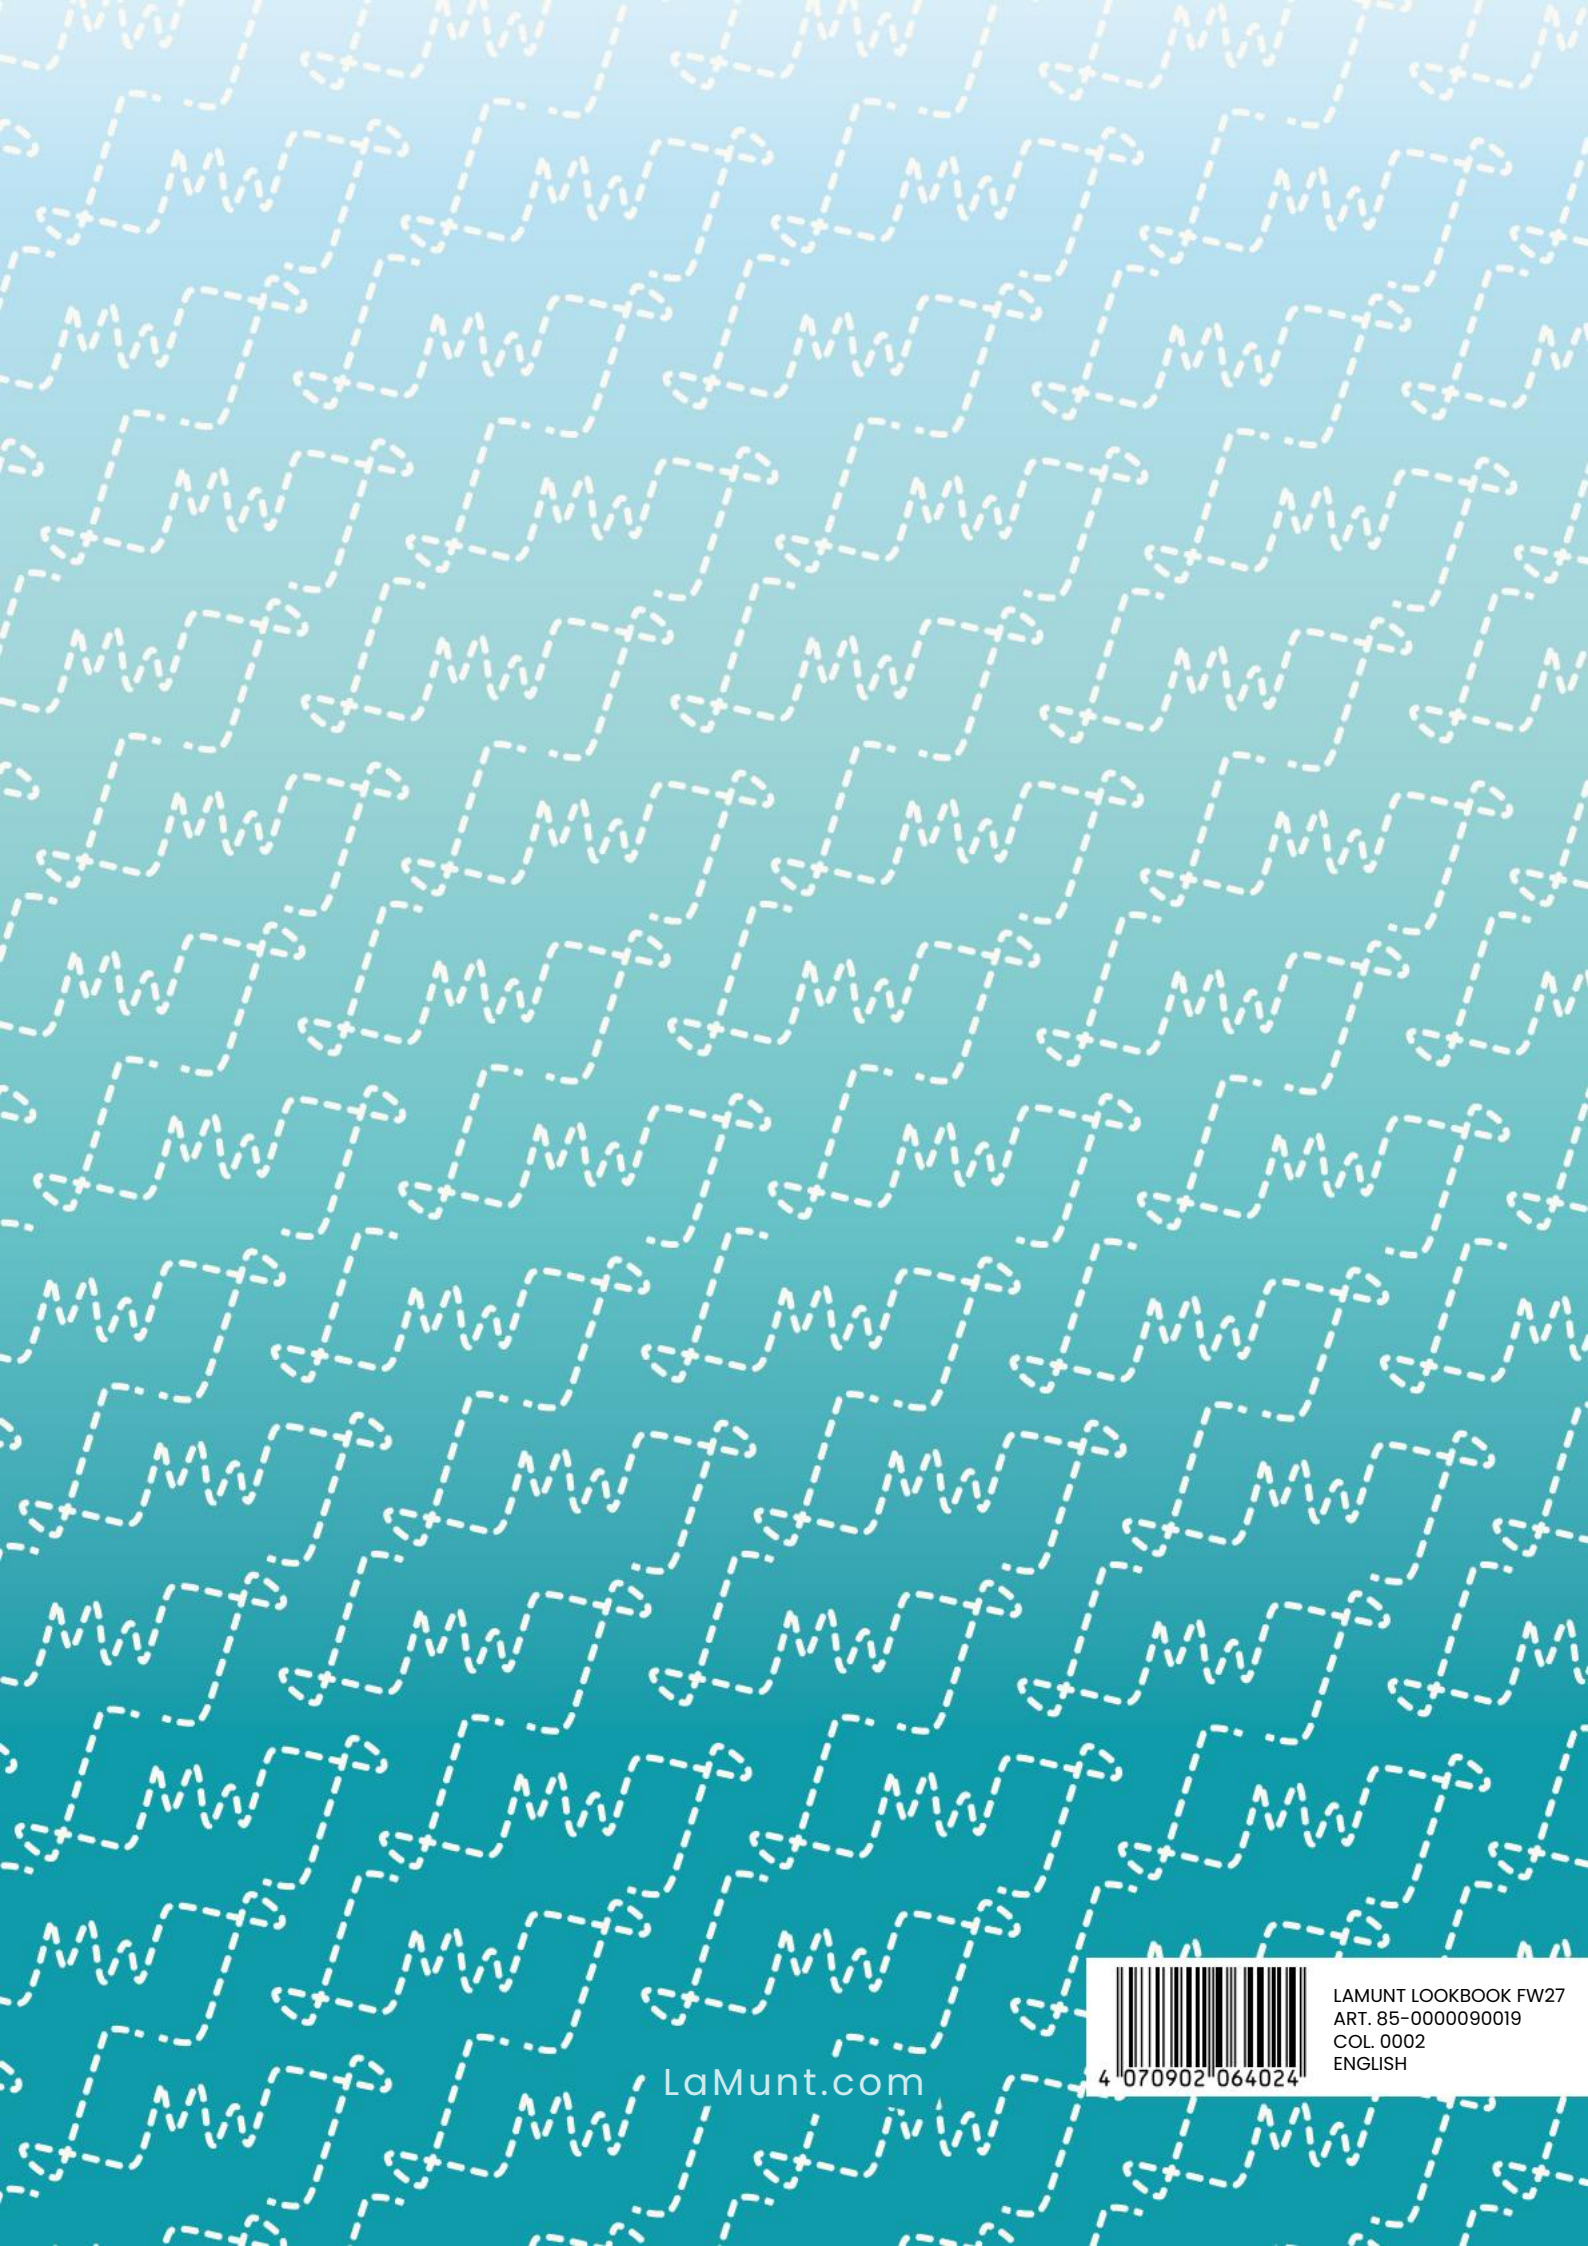

Waist
Measure between the highest point of your hip bone and the lowest rib arch.

Hips
Measure the circumference of your hips at the widest part of your butt.

Inseam
Measure between the uppermost part of your thigh to your ankle
